REMARKS [REDACTED]

25X1

1. The military and civilian airfield is just east of Nitra (P 49/T 62). It was level, dry, and measured about 800x1, 600 meters. There were two hangars, each about 15 x 40 meters.\*
2. Though the field was under military administration no military training flights were made. The field was occupied by about 15 light aircraft of different types which were flown by civilians, military personnel and SIBpilots.\*\*
3. During the time Slovakia was nominally autonomous under Germany an observation squadron was stationed at the field. The Praz aircraft plant was adjacent to the field.

25X1

\* [REDACTED] Comment. This is the first information as to the size and location of the field.
